

Re: Telephone Consumer Protection Act, Docket 02-278

Do NOT allow the "Deep Pockets" to successfuuly lobby to weaken our New Jersey "Do Not Call Law". Telemarketing is intrusive, and we as citizens have a right to privacy.

With respect to the idea that they should be allowed to contact anyone with whom they have conducted business within the last 30 days, my rebuttal is that if I have done business with them within the past 30 days, I already know who the business is and how to get in touch with them if I am so inclined. No further contact on their part is necessary or desirable.
